	6"	279	5"	279	DN150	285	DN150	285	DN125	270	DN125	270

SUREBANDClear standard part numbers are expressed and explained as follows:-

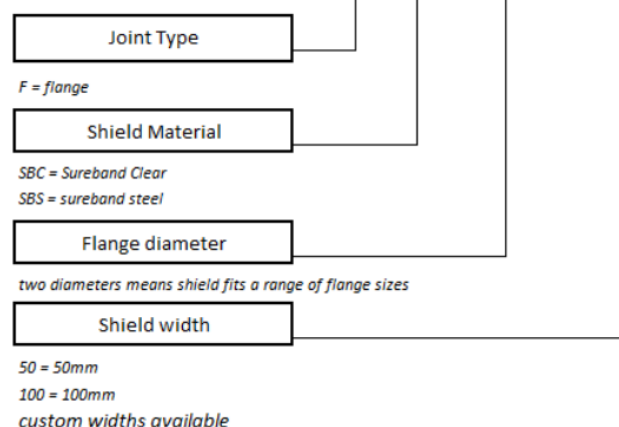

All SUREBAND and other FLANGE GUARDS shields contain our part codes, but we will also print the flange size too (unless this information has not been supplied). This helps the installer identify the correct shield for any given flange. We can print any customer part code, flange size, tag number or other code on the shield, to assist site identification.

Delivery

Most shield materials and sizes are available on a short lead time.

Please call for assistance or e-mail sales@williamjohnston.co.uk

Part No: F - SBC - 178/191 - 50
